Meeting the statutory requirements of The Primary National Curriculum

Whole School Programme of Study

Reasoning Behind our Geography Curriculum

Geographical Vocabulary

Progression in Geographical knowledge, skills and understanding

What will Geography look like in the classroom?

Assessment / SEN

Analysing the impact of our Geography Curriculum

Curriculum Intent

Intent - Our aim is for all children to have an understanding of the world in which they live, both their local area and the world beyond, and an appreciation of the natural world.

This vision is achieved by:

- A curriculum that promotes curiosity and a fascination of the world
- A curriculum which encourages children to become responsible, global citizens
- A curriculum which equips children with the skills to navigate and explore

Geography in The Early Years Foundation Stage

Each area of the EYFS curriculum has an **Early Learning Goal**, which is the standard that a child is expected to achieve by the end of their reception year. The ELG (Early Learning Goals) covers all of the 7 areas of learning as specified in the Early Years Foundation Stage Curriculum.

The Unique Child reaches out to relate to people and things through the **Characteristics of Effective Learning**, which move through all areas of learning.

- playing and exploring
- active learning
- creating and thinking critically

Children develop in the context of relationships and the environment around them.

This is unique to each family, and reflects individual communities and cultures.

Prime areas are fundamental, work together, and move through to support development in all other areas.

- Personal, Social and Emotional Development
- Communication and Language
- Physical Development

Specific areas include essential skills and knowledge for children to participate successfully in society.

- Literacy
- Mathematics
- Understanding the World
- Expressive Arts and Design

The following link to the teaching and learning of Geography in our EYFS:

ELG: Understanding of the World: People and Communities

Children at the expected level of development will:

- Describe their immediate environment using knowledge from observation, discussion, stories, non-fiction texts and maps;
- Know some similarities and differences between different religious and cultural communities in this country, drawing on their experiences and what has been read in class;
- Explain some similarities and differences between life in this country and life in other countries, drawing on knowledge from stories, non-fiction texts and – when appropriate – maps.

'Roots to Grow and Wings to Fly'

KS1 YEAR ID (2023-24)	AUTUMN 1	AUTUMN 2	SPRING 1	SPRING 2	SUMMER 1	SUMMER 2	Early Learning Goal
THEME	Maps and beyond	Invaders and Raiders	Feeling hot, hot, hot	Crewkerne through the ages	Water, Water Everywhere	Going for gold

---------------------------------	---	--	--	--	--	---	---

Geography and the National Curriculum: Key Stage One

Pupils should develop knowledge about the world, the United Kingdom and their locality. They should understand basic subject-specific vocabulary relating to human and physical geography and begin to use geographical skills, including first-hand observation, to enhance their locational awareness. **Pupils should be taught to:**

Locational knowledge

- name and locate the world's seven continents and five oceans
- name, locate and identify characteristics of the four countries and capital cities of the United Kingdom and its surrounding seas

Place knowledge

- understand geographical similarities and differences through studying the human and physical geography of a small area of the United Kingdom, and of a small area in a contrasting non-European country

Human and physical geography

- identify seasonal and daily weather patterns in the United Kingdom and the location of hot and cold areas of the world in relation to the Equator and the North and South Poles
- use basic geographical vocabulary to refer to:
 - - key physical features, including: beach, cliff, coast, forest, hill, mountain, sea, ocean, river, soil, valley, vegetation, season and weather
 - - key human features, including: city, town, village, factory, farm, house, office, port, harbour and shop

Geographical skills and fieldwork

- use world maps, atlases and globes to identify the United Kingdom and its countries, as well as the countries, continents and oceans studied at this key stage
- use simple compass directions (North, South, East and West) and locational and directional language [for example, near and far; left and right], to describe the location of features and routes on a map
- use aerial photographs and plan perspectives to recognise landmarks and basic human and physical features; devise a simple map; and use and construct basic symbols in a key
- use simple fieldwork and observational skills to study the geography of their school and its grounds and the key human and physical features of its surrounding environment.

Geography and the National Curriculum: Key Stage Two

Pupils should extend their knowledge and understanding beyond the local area to include the United Kingdom and Europe, North and South America. This will include the location and characteristics of a range of the world's most significant human and physical features. They should develop their use of geographical knowledge, understanding and skills to enhance their locational and place knowledge. **Pupils should be taught to:**

Locational knowledge

- locate the world's countries, using maps to focus on Europe (including the location of Russia) and North and South America, concentrating on their environmental regions, key physical and human characteristics, countries, and major cities
- name and locate counties and cities of the United Kingdom, geographical regions and their identifying human and physical characteristics, key topographical features (including hills, mountains, coasts and rivers), and land-use patterns; and understand how some of these aspects have changed over time
- identify the position and significance of latitude, longitude, Equator, Northern Hemisphere, Southern Hemisphere, the Tropics of Cancer and Capricorn, Arctic and Antarctic Circle, the Prime/Greenwich Meridian and time zones (including day and night)

Place knowledge

- understand geographical similarities and differences through the study of human and physical geography of a region of the United Kingdom, a region in a European country, and a region within North or South America

Human and physical geography

Describe and understand key aspects of:

- physical geography, including: climate zones, biomes and vegetation belts, rivers, mountains, volcanoes and earthquakes, and the water cycle
- human geography, including: types of settlement and land use, economic activity including trade links, and the distribution of natural resources including energy, food, minerals and water

Geographical skills and fieldwork

- use maps, atlases, globes and digital/computer mapping to locate countries and describe features studied
- use the eight points of a compass, four and six-figure grid references, symbols and key (including the use of Ordnance Survey maps) to build their knowledge of the United Kingdom and the wider world
- use fieldwork to observe, measure, record and present the human and physical features in the local area using a range of methods, including sketch maps, plans and graphs, and digital technologies.

Whole School Programme of Study

Year C = 2022 - 2023

KS1 YEAR C (2022-23)	AUTUMN 1	SPRING 1	SUMMER 1
THEME	Over the hills and far away	From Crewkerne to the rainforest	Reduce, Reuse, Recycle
KS1	How wonderful is our country? (The UK)	How is Crewkerne different from Brazil? (contrasting non-European locality)	How do we recycle in Crewkerne? (Field work) (My local Area)
KS2	How are mountains formed?	What do we know about life in Brazil?	Is our planet sustainable? (Field work)

Year D = 2023 – 2024

KS1 YEAR D (2023-24)	AUTUMN 1	SPRING 1	SUMMER 1
THEME	Maps and beyond	Feeling hot, hot, hot	Water, Water Everywhere
KS1	What is around our school? (Field Work) / (My local area)	Where in the world is hot and cold?	Where are the worlds oceans, seas and rivers?
KS2	How to use maps to find out about the UK?	How does the climate affect life on earth?	Why are rivers important? (Field work)

Year A = 2024 – 2025

KS1 YEAR A (2024-25)	AUTUMN 1	SPRING 1	SUMMER 1
THEME	Everyone Needs Good Neighbours	We Are United	Our extreme wild world
KS1	Where in the world are we? (Field Work)	<i>Why is the world wonderful?</i>	Can we become meteorologists?
KS2	What do we know about our European neighbours?	Where can maps take us? (Global) (Field work)	Can the Earth shake rattle and roll?

Year B = 2025 – 2026

KS1 YEAR B (2025-26)	AUTUMN 1	SPRING 1	SUMMER 1
THEME	Oh the places you'll go!	All At Sea	The Americas
KS1	Where can maps take you?	What do we know about the seaside?	How is Crewkerne different to Mexico?
KS2	Why do people visit Somerset?	What do you know about our local coastline? <i>(Field work)</i>	What are the geographical similarities and differences between North and South America?

Reasoning Behind our Geography Curriculum

STAGE	TOPIC	WE TEACH THIS BECAUSE ...	BUILD ON LEARNING ...	FUTURE LEARNING ...	LINKS TO ST BARTS SCHOOL LIFE ...
KS1	How wonderful is our country?	<p>This unit will teach about the countries of the UK developing learning beyond children's immediate environment and own locality to the UK in general.</p> <p>Children will explore the UK by looking at individual countries, capital cities, human and physical features along with comparing and contrasting the capital cities of London and Brasilia in detail. This unit provides our children a greater insight into the UK and beyond.</p>	<p>EYFS: To know the name of the town the school is in.</p> <p>To know about features of the immediate environment.</p> <p>To know about features of my own immediate environment and how they might vary from another.</p>	<p>KS1: Where in the world are we? Where can maps take you?</p> <p>KS2: How to use maps to find out about the UK? Where can maps take us? Why do people visit Somerset?</p>	<p>Christian Values: Respect / Compassion / Hope</p>
KS1	How is Crewkerne different from Brazil?	<p>This unit focuses on the geography of Brazil through focusing on the main human and physical features of the country, extending children's knowledge of the world.</p> <p>Children will learn about the geographical similarities and differences between Brazil and the United Kingdom.</p> <p>Children continue to build on their map skills using atlases, world maps and globes more widely, along with using webcams, online mapping programmes and interpreting a range of information.</p>	<p>EYFS: To know that people in other countries may speak different languages</p> <p>To know about features of the world and Earth</p>	<p>KS1: How is Crewkerne different to Mexico? Where in the world is hot and cold?</p> <p>KS2: What do we know about life in Brazil? What are the geographical similarities and differences between North and South America?</p>	<p>Christian Values: Respect / Compassion / Hope</p>

'Roots to Grow and Wings to Fly'

<p>KS1</p>	<p>How do we recycle in Crewkerne?</p>	<ul style="list-style-type: none"> This unit will focus on recycling in our local area, Crewkerne. To begin children will use google maps to locate their town and school. They will then explore What happens to my school's rubbish and What recycling provision is in my local area. Throughout the unit, children will understand geographical vocabulary such as 'rubbish', 'waste', 'landfills', 'gases' and recognise how waste affects our environment. 	<p>EYFS: To respect and care for the natural environments</p>	<p>KS2: Is our planet sustainable?</p>	<p>Christian Values: Respect / Compassion / Hope / Trust / Aspiration / Courage</p>
<p>KS1</p>	<p>What is around our school?</p>	<p>This unit will teach about the world, starting with their immediate environment and building on the firm foundations from the Early Years Foundation Stage.</p> <p>Children will explore their school environment using first-hand observation and experience to enhance their awareness along with essential map skills and fieldwork.</p>	<p>EYFS: To know the name of the town the school is in.</p> <p>To know about features of the immediate environment.</p> <p>To know about features of my own immediate environment and how they might vary from another.</p>	<p>KS1: How wonderful is our country? Where in the world are we? Where can maps take you?</p> <p>KS2: How to use maps to find out about the UK? Where can maps take us? Why do people visit Somerset?</p>	<p>Christian Values: Respect / Compassion</p>
<p>KS1</p>	<p>Where in the world is hot and cold?</p>	<p>This unit will teach our children about the location of countries, continents and oceans of the world in relation to the position of the United Kingdom and Crewkerne.</p> <p>Children will develop global awareness by looking in detail at the position of the seven continents and five oceans of the world, understanding that the world is spherical and creating their own journeys across the world.</p> <p>Children will continue to build on their map skills developed using atlases, world maps and globes more widely, along with using aerial photographs to recognise human and physical features including landmarks.</p>	<p>EYFS: To know about different habitats</p> <p>To respect and care for the natural environments</p> <p>To know about features of the world and Earth</p>	<p>KS1: Can we become meteorologists?</p> <p>KS2: Can the Earth shake rattle and roll? How does the climate affect life on earth?</p>	<p>Christian Values: Respect / Compassion / Hope / Trust / Aspiration / Courage</p>

'Roots to Grow and Wings to Fly'

'Roots to Grow and Wings to Fly'

		photographs to recognise human and physical features including landmarks.	To know about features of the world and Earth	Why do people visit Somerset?	
KS1	Can we become meteorologists?	This unit will explore aspects of weather. Children will build knowledge of seasonal and daily weather patterns in the UK. They will make simple weather measuring instruments and contribute to a class weather station and weather chart.	EYFS: To know about and recognise the signs of Autumn / Winter / Spring / Summer	KS1: Where in the world is hot and cold? KS2: Can the Earth shake rattle and roll? How does the climate affect life on earth?	Christian Values: Respect / Compassion / Hope
KS1	Where can maps take you?	This unit will teach our children key map skills through a range of engaging geographical skill based activities. Children will explore a range of maps at a local, national and global level, developing their understanding of how to navigate around an atlas to find key countries, continents, oceans and seas along with devising their own maps and routes . They will learn how to 'view from above' looking at aerial photographs to spot human and physical features, understand simple map symbols, compass directions and develop key geographical vocabulary throughout the unit.	EYFS: To know that simple symbols are used to identify features on a map	KS1: Where in the world are we? How wonderful is our country? KS2: How to use maps to find out about the UK? Where can maps take us? Why do people visit Somerset?	Christian Values: Respect / Compassion / Hope
KS1	What do we know about the seaside?	This unit will visit oceans, seas, continents and countries. Children will find out about different human and physical features of our seas and coasts. They will also learn about jobs and resources that are linked to the sea. They will carry out research in the classroom and a field trip to the beach (charmouth or lyme regis).	EYFS: To respect and care for the natural environments To know about features of the world and Earth	KS1: Where are the worlds oceans, seas and rivers? KS2: What do you know about our local coastline?	Christian Values: Respect / Compassion / Hope / Trust / Aspiration / Courage
KS1	How is Crewkerne different to Mexico?	This unit focuses on the geography of Mexico through focusing on the main human and physical features of the country, extending children's knowledge of the world.	EYFS: EYFS: To know that people in other	KS1: How is Crewkerne different from Brazil?	Christian Values: Respect / Compassion / Hope

--	--	--	---	--	--

STAGE	TOPIC	WE TEACH THIS BECAUSE ...	BUILD ON LEARNING ...	FUTURE LEARNING ...	LINKS TO ST BARTS SCHOOL LIFE ...
KS2	How are mountains formed?	In this Unit, children find out about the major mountains of the world and the UK. They find out the different ways in which mountains have been formed, and how different features of mountain ranges have been shaped over time. Children will have the opportunity to consider what the weather is like in a mountainous environment and to evaluate the impact that tourism has on a mountainous region.	KS1: How wonderful is our country?	KS2: Can the Earth shake rattle and roll?	Christian Values: <i>Respect / Courage / Trust</i>
	What do we know about life in Brazil?	In this unit, children will learn where in the world is Brazil and what it is like to live in Rio de Janeiro. They will also compare the lives of children in Rio de Janeiro to the lives of children in the UK. Also, they will explore why is the Amazon rainforest so important for our planet and how is life in the Amazon rainforest under threat?	KS1: How is Crewkerne different from Brazil? How is Crewkerne different to Mexico?	KS2: What are the geographical similarities and differences between North and South America?	Christian Values: Respect / Compassion / Hope / Trust / Aspiration / Courage
	Is our planet sustainable? (Field work)	In this unit, children will discover some of the many ways in which the world around them is changing. From coastal erosion to political changes, there are many factors at work. Children will learn about the structure of the United Kingdom and how its shape and geography have changed over	KS1: How do we recycle in Crewkerne?	KS2: How does the climate affect life on earth?	Christian Values: <i>Respect / Compassion / Hope / Trust /</i>

'Roots to Grow and Wings to Fly'

		thousands of years. Using an online database of photographs, children can explore how landscapes change. In the final lesson of this unit, children have the chance to predict the future and look at which might change again in their lifetimes.			<i>Forgiveness / Courage</i>
How to use maps to find out about the UK?	Marvellous Maps allows children to further explore the range of maps available to geographers and to develop their understanding of the key features of maps. They will study a range of maps and atlases, including digital maps, and compare their features. They will learn to use the eight compass points to give directions and give grid references to locate places on a map. By comparing maps of the same place, children will learn about the way that places have changed over time.	KS1: How wonderful is our country? What is around our school? <i>Why is the world wonderful?</i>	KS2: Where can maps take us? Why do people visit Somerset?	Christian Values: Respect / Compassion / Hope / Trust	
How does the climate affect life on earth?	This unit allows children to take a closer look at where the countries of the world are located, and some of the way's geographers describe locations. Children will learn to locate and describe places using longitude and latitude, and find out about some of the important lines that delineate specific areas of the Earth - the Equator, the Hemispheres, the Poles and the Tropics. Finally, by looking more closely at the lines of longitude, children will develop their understanding of time zones.	KS1: Where in the world is hot and cold? Can we become meteorologists?	KS2: Can the Earth shake rattle and roll?	Christian Values: Respect / Compassion / Hope	
Why are rivers important? (Field work)	In this unit, the children will find out more about why rivers are so important to the towns and villages that have developed on their banks. By looking at the features of rivers, and the natural and human ways that rivers change over time, children will explore the life stories of rivers. Children will learn the names and locations of the major rivers of the UK and the world.	KS1: Where are the worlds oceans, seas and rivers?	KS2: What do you know about our local coastline?	Christian Values: Respect / Compassion / Hope / Trust	
What do we know about our European neighbours?	This unit will teach children about where in the world is Europe. It will develop children's geographical skills through using maps to locate countries and capital cities in Europe. Through discussion and practical tasks, children will learn about the similarities and differences between London and Paris. This unit is an important part of the geography curriculum to teach our children acceptance of others.	KS1: Where in the world are we?	KS2: Where can maps take us?	Christian Values: Respect / Compassion / Hope / Trust

	<p>Where can maps take us? (Global) (Field work)</p>	<p>Marvellous Maps allows children to further explore the range of maps available to geographers and to develop their understanding of the key features of maps. They will study a range of maps and atlases, including digital maps, and compare their features. They will learn to use the eight compass points to give directions and give grid references to locate places on a map. By comparing maps of the same place, children will learn about the way that places have changed over time.</p>	<p>KS1: How to use maps to find out about the UK?</p>	<p>KS2: Why do people visit Somerset?</p>	<p>Christian Values: Respect / Compassion / Hope / Trust / Aspiration / Courage</p>
	<p>Can the Earth shake rattle and roll?</p>	<p>This unit will teach children about the destructive powers of nature, from volcanoes and earthquakes to tsunamis and tornadoes. Through discussion and practical tasks, children will learn about how and why these natural phenomena occur, and the ways in which they affect people and the environment.</p>	<p>KS1: Can we become meteorologists?</p>	<p>KS2: How are mountains formed?</p>	<p>Christian Values: Respect / Compassion / Hope / Trust / Forgiveness / Courage</p>
	<p>Why do people visit Somerset?</p>	<p>In this unit, the children increase their local locational knowledge by studying why people visit Somerset? By looking at where Somerset is, where do people go when they visit, whether or not Somerset is family friendly and how we can encourage more people to visit, children's understanding of place will increase.</p>	<p>KS1: Where can maps take you?</p>	<p>KS2: How to use maps to find out about the UK?</p>	<p>Christian Values: Respect / Compassion / Hope / Trust / Aspiration / Courage</p>
	<p>What do you know about our local coastline? (Field work)</p>	<p>In this unit, the children will investigate coastlines and the animals and plants that live there. They will carry out research in the classroom and a field trip to the beach (charmouth or lyme regis).`</p>	<p>KS1:What do we know about the seaside? Where are the worlds oceans, seas and rivers?</p>	<p>KS2: Why are rivers important?</p>	<p>Christian Values: Respect / Compassion / Hope / Trust</p>
	<p>What are the geographical similarities and differences between North and South America?</p>	<p>In this unit, the children will learn where in the world are the Americas and which countries are located in North and South America. They will also explore how the landscapes vary from the Andes mountains to the Atacama Desert. They will also explore why do the Americas have so many time zones?</p>	<p>KS1: How is Crewkerne different to Mexico? How is Crewkerne different from Brazil?</p>	<p>KS2: What do we know about life in Brazil?</p>	<p>Christian Values: Respect / Compassion / Hope / Trust / Aspiration / Courage</p>

Progression in Geography

	EYFS	Year 1	Year 2	Lower KS2	Upper KS2
Geographical skills and fieldwork	<p>Graphicacy skills:</p> <ul style="list-style-type: none"> *Identify a map. * Begin to make attempts at drawing a map *Make attempts to draw and label features of familiar environments and imaginary places *Begin to use secondary sources (e.g. photographs, sketches or films) to find out about places <p>Fieldwork enquiry and practical skills:</p> <ul style="list-style-type: none"> *Make basic observations of familiar environments, including identifying some similarities and differences between places. *Use everyday language to talk about distance and relative positions (behind, next to) in the local environment. <p>Academic skills:</p> <ul style="list-style-type: none"> * Begin to ask and answer simple questions about what has been observed. 	To use location and directional language [for example, near and far; left and right] to describe the location of features and routes on a map	To use simple compass directions (North, South, East and West) to describe the location of features and routes on a map	To use the eight points of a compass to build their knowledge of the United Kingdom and the wider world	To use the eight points of a compass, four and six-figure grid references and keys to build their knowledge of the United Kingdom and the wider world
		To recognise features of my town or school on an aerial photograph	To use aerial photographs and plan perspectives to recognise landmarks and basic human and physical features	To use maps, atlases, globes and digital/computer mapping to locate countries and describe features studied	
		To construct simple maps of my classroom or school	To devise a simple map; and use and construct basic symbols in a key	To use the four figure grid references, symbols and keys to build their knowledge of the United Kingdom and the wider world	To use Ordnance Survey maps to build my knowledge of the United Kingdom
		To use simple fieldwork and observational skills to study the geography of my school and its grounds	To use simple fieldwork and observational skills to study the key human and physical features my surrounding environment.	To use fieldwork to observe, measure, record and present the human and physical features in the local area	To use fieldwork to observe, measure, record and present the human and physical features in the local area using a range of methods, including sketch maps, plans and graphs, and digital technologies.
		To look at books and photographs of different locations	To research locations	To use a range of sources to collect information about a location	To present information about a location using information from a range of sources
		To use basic geographical vocabulary to refer to key physical features including: beach, cliff, coast, forest, hill, mountain, sea, ocean, river, soil, valley and weather	To use basic geographical vocabulary to refer to key physical features including: beach, cliff, coast, forest, hill, mountain, sea, ocean, river, soil, valley, vegetation, season and weather	To make predictions about a locality by studying its geographical location and features	To show an awareness of some key geographical concepts such as: conflict, interdependence, change, inequality, sustainability, human impact, culture and diversity
		To use basic geographical vocabulary to refer to key human features including: city, town, village, factory, farm, house, office and shop	To use basic geographical vocabulary to refer to key human features including: city, town, village, factory, farm, house, office, port, harbour and shop	To answer questions about how two locations are similar or different	

	EYFS	Year 1	Year 2	Lower KS2	Upper KS2
Alternate location knowledge and skills	<ul style="list-style-type: none"> * Begin naming features/familiar places within the local environment e.g. school, home, house, road, park * Make observations of the local environment and begin to understand why some things occur and/or change * Identify and begin to describe the daily weather and seasons using basic vocabulary * Identify similarities and differences between familiar places using basic vocabulary 	To recognise that places contain physical/natural and human/made features	To understand geographical similarities and differences through studying the human and physical geography of a small area of the United Kingdom and a small area in a contrasting non-European country	To understand geographical similarities and differences through the study of human and physical geography of a region of the United Kingdom, a region in a European country, and a region within North or South America	
		To know the names of some countries of the world	To name and locate the world's seven continents and five oceans	To name major world geographical features such as: The Nile, The Amazon Rainforest, The Sahara Desert, The Himalayas	To name major environments (biomes) and their importance to the world such as: The Great Barrier Reef, The Amazon Rainforest, The African Savannah, The Arctic Tundra, The North American Taiga
		To use world maps, atlases and globes to identify countries	To use world maps, atlases and globes to identify countries, continents and oceans studied	To use a map to locate the world's countries with a focus on Europe	To use maps and atlases to locate countries concentrating on their environmental regions, key physical and human characteristics, countries, and major cities

'Roots to Grow and Wings to Fly'

		To talk about how the weather conditions in a place are similar or different	To compare weather in the United Kingdom and the location of hot and cold areas of the world in relation to the Equator and the North and South Poles	To identify latitude and longitude	To identify the position and significance of latitude, longitude, the Prime/Greenwich Meridian and time zones (including day and night)
				To identify the position and significance of the Equator, Northern Hemisphere, Southern Hemisphere, Arctic and Antarctic Circle	To identify the position and significance of the Equator, Northern Hemisphere, Southern Hemisphere, the Tropics of Cancer and Capricorn and the Arctic and Antarctic Circle
				To describe and understand key aspects of human geography including: types of settlement and land use and economic activity	To describe and understand key aspects of human geography including trade links, and the distribution of natural resources (e.g. energy, food, minerals and water)
				To describe and understand key aspects of physical geography including: volcanoes, rivers, mountains, earthquakes, flood plains	To describe and understand key aspects of physical geography including: climate zones, biomes, vegetation belts and the water cycle

	Year 1	Year 2	Lower KS2	Upper KS2
UK Locational knowledge	To use world maps, atlases and globes to identify the United Kingdom and its countries	To name, locate and identify characteristics of the four countries of the United Kingdom	To name and locate counties and cities of the United Kingdom	To name and locate geographical regions of the United Kingdom and key topographical features (including hills, mountains, coasts and rivers)
	To find my town on a map of the United Kingdom	To name and locate the four capital cities of the United Kingdom		
	To know that that the United Kingdom is an island	To name and locate the United Kingdom's surrounding seas	To identify human and physical characteristics of the United Kingdom and land-use patterns	To understand how the human and physical characteristics of the United Kingdom have changed over time
	To observe changes across the four seasons	To identify seasonal and daily weather patterns in the United Kingdom	To know the difference between climate and weather	To know that climate change can only be seen in patterns over time
	* Begin to identify the locations of their home and school and other familiar places.			
	*Begin to describe locations using simple locational and directional language.			
	*Begin to ask and answer simple geographical questions linked to location e.g. Where is...?			
	*Discuss and begin to describe own significant places such as home and school.			
	*Begin to identify the main geographical features of their immediate environment			
	*Understand that places can have similarities and differences.			
	*Develop a basic, personal understanding of the term 'place', linked to own homes, own classrooms and areas they use regularly, showing an awareness of where things belong and of the people within the school and at home			

What will Geography look like in the classroom?

- * Placing of the Geography being studied in the context of previous learning, using maps and starter activities.
- * Lesson starter activity and low stakes quizzing – reviewing previous learning and consolidation of knowledge and skills through starter activities.
- * Specify key vocabulary to be used and its meaning.
- * Conduct geographical enquiry using a variety of sources and through carefully planned fieldwork visits in the local area.
- * Research, investigation and interpretation of findings.
- * Children will communicate their geographical knowledge and understanding appropriately.
- * Children evaluate their learning and compare with other locations studied (as appropriate).
- * Display maps, globes and other resources to support and enhance learning.
- * Appropriately challenging texts will be available to develop wider understanding.

Strategies for teaching Geography

When teaching Geography, we:

- Always explain what we want pupils to know, understand and be able to do as a result of their learning in Geography.
- Use geographical questions as topic titles to focus planning, learning and assessment.
- Use starters and plenaries to ensure students fully understand what the children are learning, how they learn and how well they are progressing.
- Vary the resources and activities to ensure each pupil can learn effectively for example:
- Give tasks appropriate to group ability.
- Give tasks of increasing difficulty aimed at more able and Gifted and Talented children.
- Offer support and adapted tasks for children with special educational needs.
- The children are offered opportunities to use maps, atlases, globes, statistics, reference books, pictures and aerial photographs.
- Classroom assistants to support individuals or groups.

Reading in Geography

Reading is at the heart of the curriculum. It is our intent to ensure that every child not only develops the skills of reading but also a love of reading that will last them a lifetime. Our children read at home and school for pleasure, for information and to expand and enhance their knowledge and understanding across all subjects. Our children not only learn to read, they read to learn. Appropriate opportunities are taken to enhance children's learning in science through reading with the use of high-quality texts across a wide range of genres.

These are systematically matched to each topic in each year group, in order to impact on learning in the following ways:

- Knowledge of an extensive and subject-specific vocabulary.
- Fluency and accuracy in reading across a wide range of contexts throughout the curriculum.
- The motivation to read for both study and for pleasure.
- Extensive knowledge through having read a rich and varied range of texts.
- Excellent phonic knowledge and skills.
- An excellent comprehension of texts.
- A desire to embrace challenging activities, including opportunities to undertake high-quality research, as well as interpret and present their findings.
- A respect for geographical evidence and the ability to make robust use of it to support their explanations and judgments.
- The ability to think, reflect, debate, discuss and evaluate processes (both human and physical).
- The ability to consistently support, evaluate and challenge their own and others' views using detailed, appropriate and accurate geographical knowledge derived from a range of sources.

Assessment

- *We assess pupils as we observe them during lessons and when teachers mark their work.
- *Geographical skills and learning can be enhanced through effective verbal and written questions.
- * Staff use the rising stars progression framework to support assessment judgements.

SEN

It is important for teachers to plan work in geography which facilitates high expectations, matches children's needs and helps them to make progress.

Teachers implement and develop strategies to support SEN pupils whilst supporting inclusion in geography. Teachers plan for appropriate pace and use a range of kinaesthetic /multi-sensory tools to promote enjoyment and progress.

Knowledge and skills can be developed in small steps through analogies, drama and practical activities. Paired and group work in history is widely used and can foster interpersonal and communication skills. Carefully matched work suited to the child's own needs and range of learning can promote confidence and stimulate an interest in future learning, leading to a better understanding of the world around them.

The geography subject leader monitors samples of children's work across the school and conducts regular work scrutinies (book looks). Furthermore, in KS2 their pupil voice is taken into consideration to help teachers to plan an effective and inspiring curriculum.

Monitoring and review

Monitoring of the standards of work and the quality of teaching in Geography is the responsibility of the subject leader.

The work of the subject leader also includes supporting colleagues in the teaching of Geography, updating staff on current developments in the subject and providing lead and direction for the subject in the school.

Observations of teaching, planning and work scrutiny take place over the course of the year in order to maintain and continue to raise standards.

Fieldwork Visits

Good Geography teaching requires opportunities to involve children in practical research and enquiry in all year groups.

At St Bartholomew's, this ranges from observational walks around school and in the locality to contrasting localities in the UK and Europe.

During fieldwork visits, children should be given the opportunity to practice skills introduced in the classroom, such as map reading using Ordnance Survey maps, using four and six-figure grid references and developing compass skills.
